

Bannau Brycheiniog (Brecon Beacons) National Park

Forecast valid from 06:00 on Monday 30 Sep 2024 until 23:59 on Tuesday 01 Oct 2024

Forecast Issued on Monday 30 Sep 2024 at 03:10

Confidence: High for rather cloud day Monday, but only Moderate for the rainfall detail, especially any heavier bursts early afternoon, and further rain overnight. High for this clearing Tuesday, but only Moderate for the timing of this clearance, and also for the return of some cloudier weather into eastern parts during the evening. High for a change to generally fine weather Wednesday and Thursday with lighter winds, but low for the extent of any early morning mist or fog patches in valleys. Moderate for staying dry Friday, but also for winds to be strengthening through the day.

Headline for Monday 30 Sep 2024: Cloudy, with early drizzle. Some heavier rain possible early afternoon, before clearing. Further rain likely overnight.

Mountain weather hazards on Monday 30 Sep 2024

Blizzards No Likelihood	Heavy persistent snow No Likelihood	Storm force winds No Likelihood
Gales No Likelihood	Severe chill effect Low Likelihood	Poor visibility Medium Likelihood
Thunderstorms No Likelihood	Heavy persistent rain Low Likelihood	Strong sunlight No Likelihood

Forecast for Monday 30 Sep 2024

Weather: Cloudy with spells of drizzle through the morning, and perhaps some outbreaks of heavier rain moving into western parts during the afternoon. Some drier intervals also possible, most likely in the east. Further cloud and outbreaks of light rain and drizzle potentially moving into northern parts by midnight.

Chance of cloud-free hill tops above 600m: 10% increasing to 60% by the afternoon, but falling to 30% after dark.

Low cloud and visibility: Extensive cloud obscuring routes above 400m during the morning, with some patches down to 300m. This lifting a little during the afternoon, but some cloud lingering at 600m, especially during any heavy rain that occurs. Further cloud spreading south during the evening, especially hills above 500m. Moderate visibility for much of the day, but becoming poor during any heavy rain or drizzle.

Meteorologist's View

Rather poor day, with occasional rain and drizzle leading to limited views and waterproofs being essential. Routes are likely to be wet after overnight heavy rain, along with higher running rivers. Feeling cold, especially in the breeze on the tops.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Tuesday 01 Oct 2024

Weather: Overnight cloud and rain soon clearing south. Staying cloudy during the morning with the odd shower possible but likely turning a much brighter day with sunny spells and occasional cloudier periods by the afternoon. Further cloud and drizzle likely returning from the northwest during the evening.

Maximum wind: Northerly 20 mph gust 30mph.

Chance of cloud-free hill tops 600m: 30% at first rising to 70%, but falling to 30% in the east after dark

Low cloud and visibility: Early cloud obscuring routes above 500m lifting and breaking to give periods of cloud above 800m by the afternoon. Cloud returning above 500m after dark across eastern hills. Generally good visibility, but falling to moderate at times during any rain or showers that occur.

Temperature: **Valleys:** Plus 8 Celsius rising to Plus 16 Celsius.
At 600m: Plus 8 Celsius rising to Plus 11 Celsius.
Freezing level: Above the summits.
